CAPTAIN MARVEL BIOGRAPHY

Military Service and Gaining her Powers

Carol would join the United States Air Force, and befriend Maria Rambeau, and became her daughter's godmother, Monica. Danvers would meet Dr. Wendy Lawson, and became a contributor to Project P.E.G.A.S.U.S. on the Light-Speed Engine. During one test flight, both her and Lawson were struck down by unknown assailants. Lawson informed Danvers of who she was, and attempted to destroy the engine, but was killed by the assailant. When Carol went to destroy the engine herself, it exploded, and she absorbed its powers and was knocked unconscious.

The assailants were Starforce, a Kree unit led by Yon-Rogg, who decided to take Danvers as she could be some use since she absorbed the energy. She was taken to Hala where Yon-Rogg transfused his blood into her, and placed a Photon Inhibitor to suppress her powers and memories. Danvers was told that she was a Kree that had amnesia due to a Skrull attack, and went by the name "Vers" due it being the last letters on her damaged dog tag.

Defeating the Kree

When Ronan arrived with his fleet, Danvers flew into combat by destroying ballistic missiles. After destroying the entire fleet, Ronan decided to retreat, and referred to Danvers as "a weapon". With Earth safe from the skies, Carol returned to the surface to face against Yon-Rogg. He attempted to start a fight in hand-to-hand, but Danvers blasted him in the chest, stating she had nothing to prove to him. While dragging him to his pod, she instructed him to tell Supreme intelligence that she as coming to end the wars and lies.

Carol returned to the Rambeau's home where they celebrated victory over the Kree, and was nicknamed "Marvel" by Fury. Carol then returned him his pager, having modified it so that she could call him.

Impact on Fury

After Captain Marvel left Earth, Fury realized that Earth needed an arsenal of superheroes who could protect it from threats. Fury decided to create the Avengers Initiative after Danvers' nickname, and the Avengers were assembled in 2012. The Avengers fought against many threats, fighting an Norse God, alien army, and a destructive artificial

intelligence, but Fury didn't contact Carol with the transmitter. It's unknown why he didn't do so, but it's assumed that he didn't think the threats were that high, or she was unable to return to her own adventures.

Nick Fury would send a call for help to Danvers after Thanos successfully collected all of the infinity stones, and decimate half of the entire universe. Receiving the message, Danvers returned to Earth and located the page at the New Avengers Facility, where she meets the few survivors: Captain America, Black Widow, Hulk, and War Machine. Danvers entered the facility and encountered the Avengers, asking them where Fury was.

Captain Marvel rescues Iron Man and Nebula after the two get stranded in outer space after leaving Titan. Later, after Hulk/Bruce Banner uses the Infinity Gauntlet to undo the snap and bring everyone back to life, Captain Marvel joined the rest of the heroes in their fight against Thanos and his army of Chitauri, Outriders and the Black Order. Danvers fought against the Mad Titan himself, but was eventually knocked down, but witnessed his defeat. Danvers attended Tony Stark's funeral, honoring his sacrifice, and she reunited with Nick Fury before returning to space. By *Spider-Man: Far From Home*, she is still off world as Peter Parker is recruited by Fury to stop the Elementals.
