

## CHARACTER PERFORMER INFORMATION

---

# SPIDER-MAN

A bite from a spider somehow granted teenager Peter Parker its arachnid abilities and instead of using them for personal gain, he decided to help others with them. An orphan living with his aunt, May Parker, the boy chose to wear a mask while fighting crime so as not to burden her with his actions.

Calling himself Spider-Man and sporting a pair of web-shooting devices he'd constructed, Parker wound up in internet videos which attracted the attention of Tony Stark. The billionaire industrialist deduced Spider-Man's secret identity and approached Parker at his and May's home in Queens, New York with a request for aid from the hero in an upcoming confrontation with Captain America and a group of other rogue Avengers and associates. Parker was initially hesitant to even admit his secret career as Spider-Man, but the thrill of adventure and Stark's talk of responsibility drew him in and he accepted the invitation, as well as a new, high-tech costume and web-shooters

## Does Whatever a Spider Can

Peter Parker's gifts from the spider bite include enhanced strength, stamina, and agility, as well as the ability to cling to nearly any surface by his hands and feet, and an internal "alarm" of sorts that warns him of impending danger. When in costume he becomes a figure in motion, leaping and jumping about with a steady stream of wisecracks.

The Spider-Man suit designed by Tony Stark includes wrist-worn web-shooters (adapted from Peter's own invention) that emit lines of synthetic "webbing" capable of supporting great weight with a high-degree of holding power. In addition, the suit provides various optical powers, a voice-changer, a drone tracking device, and some against outside elements. When not in use, the suit appears as loose, thin cloth, but when donned, it adheres tightly to the body and stretches easily to almost any movement by the wearer.

Recently, Parker acquires a specialized suit of armor from Stark that features many qualities of the inventor's own Iron Man suits, including enhanced protective layering, optics, internal air supply, along with a set of four spider-like extra "arms" that answer to the teenager's mental commands.

## To the Avengers and Beyond

After securing Peter Parker's promise of help in the aftermath of the Sokovia Accords, Tony Stark flew the teenager to Germany under the pretense, to his aunt, of a scholarship program and internship. Once there, Parker suited up in his new Stark-created Spider-Man gear and joined the confrontation under Stark's direction against the rogue heroes. Though a self-professed fan of Captain America, Parker temporarily stole the man's famous shield at the onset of the battle, and later regretted having to clash with him and his companions. Overall, Spider-Man held his own against the Falcon and the Winter Soldier, and toppled a giant-size Ant-Man. He was taken out of the fight when Ant-Man accidentally struck him while falling, however. Stark ordered Parker to stand down for the rest of the action.

Here are examples of how SPIDERMAN may pose. For photographs, make the guest the center of attention and the main focus of the photo. Notice the placement of his hands and arms in the examples.

Below are some photos of SPIDERMAN, notice the iconic SPIDERMAN poses.

Here are some ideas of photo poses when posing with people! If it's a small child, get down on their level.

Make the Guest the main focus in the photos.

# How to Be Like Spider-Man

Spider-Man is a fictional comic book superhero characterized by his iconic red-and-blue webbed body suit. Spider-Man is 5 feet 10 inches tall, weighs 167 pounds and has brown hair. Spider-Man was bitten by a spider and has obtained spider-like abilities. He has the ability to shoot web-like material from his wrists, to climb walls and to lift more than 100 times his body weight.

Spider-Man is the alter ego of Peter Parker, a teenager who attempts to balance normal adolescent struggles with the responsibilities of a costumed superhero. He has the spirit of a jokester and offers witty quips when facing villains and foes. Spider-Man's abilities include enhanced agility, super strength, the ability to cling to different surfaces and enhanced reaction time to danger as a result of his "spider-sense." This sense allows him to detect villains and other potential hazards.

Spider-Man's powers and abilities allow him to stop crime and save lives in the city of New York. However, he struggles on ways to improve his own life. He is viewed by many as a vigilante or a criminal. Spider-Man agonizes over the challenges that he faces when attempting to be a normal teenager versus being a superhero. Spider-Man lives by the saying uttered by his uncle Ben, which is that "with great power comes great responsibility."

Spiderman is not expected to do flips or any tumbling unless you feel comfortable. You can always direct the conversation back to the child/children. "Spiderman show us your webs", you ask them what their super power is or what they would want it to be. Take ideas from the movies and how to keep a conversation going for your "on-stage" time.

Once "on-stage" or in public view, you should remain in character at all times, paying close attention not to do anything that may be inappropriate. This would include things such as making adjustments to your attire or under garments, touching your face to pick your nose, and so on. Give hugs, hold hands, give pats on the back. Try and refrain from touching people's faces or playing with their hair (it may be a wig).

When taking photos, use the photos in this document as helpful hints. Get people to pose like you. Get down on a child's level. For the ladies, always kneel down to a child's level, rather than bending over.

Please be aware your environment, please DO NOT climb on tables, chairs or any other inappropriate places. Especially if we are Guest in a location. Conduct yourself in a professional manner. You represent Wolfe Mountain.

When taking photographs, please make sure your hands are visible at all times.
